

Veterinary Public Health Management

Postgraduate Degree Program at the University of Sydney

Online Postgraduate Study for busy animal health professionals

The Faculty of Veterinary Science at the University of Sydney offers a postgraduate degree program in Veterinary Public Health Management. A distance program, delivered online with short residential sessions, the course is directed towards career enhancement for animal health professionals.

Coursework in Veterinary Public Health Management integrates scientific skill with leadership competence, to produce leaders in Veterinary Public Health. The program was first delivered in 2003 to address the increasing need for veterinarians and animal scientists with developed skills to benefit the health of the whole community.
